ONLY £3.95 each exc. VAT

BLACK/SILVER KEYBOARDS BTC 5109

to match are also available at
only £4.80 each

MERU - WIRELESS IN SCHOOLS

I have had lots of requests for information on the Meru System - Wireless Networks in Schools

Lots of you would like to know if you really can log on 60+ wireless notebooks in under 30 seconds and can you really walk from one end of the school to the other end without losing your wi-fi signal and wasting more time?

The answer is "YES, you really can"

The key to the success of the Meru wireless solution is its totally innovative patented **ATC (Air Traffic Control)** technology, this technology manages signal contention with sophisticated time-based traffic controls - exactly as when directing aircraft.

If you would like a basic idea as to how much this may cost for your school, then please email us a site plan of the school site and we will provide you with a guideline cost. If you would like an actual site survey and then a full quotation for the Meru solution, then please, feel free to give us a call or email us for further information and we will arrange it for you.

We can also put you in touch with some schools that are already running this system and finding it a resounding success.

**Please telephone us on 01202 389830
or email us at sales@agileict.co.uk**

ULTRA SMALL FORM FACTOR

25cm H x 6cm W x 20cm D

- Windows XP Professional
- Acer Veriton L410

Wonderful Websites

www.senteacher.org

This site provides cost-free teaching and learning resources for students with special needs/learning disabilities. The printables page has a selection of FREE worksheets, handouts and teaching aids for every subject.

www.nhm.ac.uk

Click on the "kids only" part of the site and let your students have a look at what is going on in the Natural History Museum. Check out the live bugs or look at the old dinosaurs.

www.scishop.org

KS3 science resources for teachers and students. Select your unit of study and then on your learning objective to be directed to the perfect place to learn all about it.

www.thegrid.org.uk

A really good site for FREE teaching resources for PE, dance, games and gymnastics both in and outdoors. Click on the area you are wishing to teach and download the lesson plan.

INTERACTIVE WHITEBOARD SOLUTION

Want rid of those old, now fading ceiling mounted projectors??

The Toshiba ST20 could be the solution.

The Toshiba ESP classroom package not only has the new projector, but a robust and future-proof wall mount, an easy to use control panel and an optional security cage. Although there is still no conclusive research, safety fears are growing around the impact of projector glare in students and teachers eyes when using interactive whiteboards. Extreme short throw technology is designed to be sited very close to the whiteboard and angled, dramatically reducing both glare and shadow effects.

A major benefit of this projector is its ability to work seamlessly with your existing whiteboard installation which means there is no need to make any additional changes or investments to

the AV technology suite. Simple to set up and operate, the Toshiba classroom package avoids difficult ceiling installations and causes minimal disruption in the classroom. The angled bracket has also been designed as a future-proof solution, making it an asset that won't be outdated with the technology.

If you would like more information and/or prices on this new all in one projector solution along with details of schools that have already had it installed then please call us or email

SUPPORT

Are you fed up of having to book set slots for ICT support and then pay *extra* callout charges when an emergency arises?

Why not buy a "bank of hours" and then schedule these in as and when it suits you?

We know that one size does **NOT** fit all and we will help you find the ideal tailor-made support solution. If you take one of our support packages there is no queuing system on the phone where you then wait forever for a call back - we shall give you your own technicians direct mobile number so the person you speak to, will know your system, and therefore be the best person to answer any questions or solve any problems.

- **NO EXTRA CHARGE** telephone support - just use your bank!
- **CARRY OVER UNUSED HOURS** to the next school year!
- **ONE SET RATE** - whether it is your Admin Department or Curriculum
- **NO ADDITIONAL CALL OUT CHARGES**
- **WEEKENDS OR EVENINGS** if that is what you prefer (prices available on request)

Agile's Answers

Microsoft Office Live Workspace Coordinate your school activities

Teachers can use MS Office Live Workspace to post calendars for colleagues, homework for students, project instructions etc. They can then invite their students, colleagues or parents via email to access the workspace and deal with the documents.
