Headteacher: Mrs T Potter BEd (Hons) NPQH
Deputy Headteacher: Mr Phil Laurie

After being at Bedenham for four months in April 2009 I approached Agile ICT to find out if they could make any suggestions regarding improving the sound and vision system we had in our main school hall. We were still using an overhead projector to display things and the sound system was incredibly crackly. After considerable discussion and planning it was agreed that a multi-media projector supported by a good sound system would improve things greatly. The staff at Agile listened to what we required and offered several alternatives - having made decisions about specifications the system was installed during the summer holiday. During the installation the team were professional and considerate - always tidying up and liaising with our site manager to gain access. We are thrilled by the system, it has revolutionised assemblies and we have 'big plans' on how to make excellent use of the system for parent workshops, school productions and after school activities. For us the most important thing was that the Agile team really listened carefully to what we wanted and offered us solutions from which to choose – at all stages from planning to installation and indeed after installation when small questions have arisen the service we have received has been and is first class. Contact us, directly or via Agile, if you'd like to see and hear the system!
